

FACT SHEET
NOCHAR'S E-115

Application:

A complex liquid emulsion which will create a spray-on gel that will minimize either direct or radiant heat transfer. When blended for use in aircraft to fight wildland fires as a direct attack technology, The gel encapsulates the water to make it a more effective medium to extinguish fires.

Weight by volume:

5 U.S. pail (concentrate) = 43 lbs. (19.55 kg)

Specific Gravity:

1.04

pH Specifications:

6-8

Storage:

Keep containers sealed to prevent evaporation. Re-mix occasionally to avoid separation.

Toxicity:

Non-toxic, Non-hazardous, Non-corrosive

Disposal:

Water-soluble; rinse with fresh water. For spills, dispose of according to local, state, and Federal regulations.
